"Dear Steve:

25X1 I liked it very much. The only change might be to have had a
question period regardless of the hour. I would suggest that perhaps
25X1 [] might be very good, to tell us all why projects should
pay for themselves in at least expected returns. I might also suggest
[] who is a self styled - but very real - inventor, and also
is a very gifted speaker. His specialty is information processing
though his scope is very broad.
